The neighborhood, county and state statistics are refreshed every month and are based on public records and MLS data.

The schools information comes from Great Schools

Median Estimated Home Value vs. Median Listing Price compares an area's median estimated home value with its median listing price, using public records data and on- and off-market MLS data. Updated monthly.

Median Sales Price vs. Sales Volume compares the price trend and sales volume for homes in an area, using public records data and MLS data when available. Updated monthly.

Median Listing Price vs. Listing Volume compares the listing price and listing volume for homes in an area, using on- and off-market MLS data. Updated monthly.

Listing Inventory is based on on- and off-market MLS data. It reflects current data at the time the page is generated. If an area has distressed properties, a separate graph appears, and it reflects public records data in addition to MLS data. Updated monthly.

Median Sales Price by Square Footage shows the median price of homes reported sold in the area in the past six months, according to the size of the living space, based on MLS and public records data. Updated monthly.

Price per Square Foot of Homes Sold shows the distribution of properties reported sold in the area in the past six months, at different prices per square foot, based on MLS and public records data. Updated monthly.

Price per Bedroom of Homes Sold shows the distribution of properties reported sold in the area in the past six months, according to the number of bedrooms, based on MLS and public records data. Updated monthly.

Price Range of Homes Sold shows the distribution of homes reported sold in the area in the past six months, within different price ranges, based on MLS and public records data. Updated monthly.

Age Range of Homes Sold shows the distribution of homes reported sold in the area in the past six months, within different age ranges, based on MLS and public records data. Updated monthly.
